To whom it may concern

Münchberg, 12 June 2017

Statement on substances or products with the risk of Transmissible Spongiform Encephalopathy (TSE)

We, *BHI Biohealth International GmbH*, confirm
that to the best of our current knowledge the following products named food supplements

Order no 527800	Glucomanan capsules, 120 capsules
Order no 527801	Collagen powder, 300 g

do not contain or are not derived from substances or products that are not safe concerning the risk of Transmissible Spongiform Encephalopathy (TSE) like Bovine Spongiform Encephalopathy (BSE) and others. All used constituents of animal origin are from healthy animals that have been slaughtered in approved slaughterhouses. These constituents are in compliance within the consolidated texts of regulation (EC) no 999/2011 *laying down rules for the prevention, control and eradication of certain transmissible spongiform encephalopathies* and regulation (EC) no 853/2004 *laying down specific hygiene rules for food of animal origin*.
